ELM.

MEDINAH, SAUDI ARABIA

Interest in Software Engineering Opportunities

Dear Elm team

About Me

I am a senior software engineer with 6+ years of experience developing multiple ecommerce and fintech applications for major private and semi-private sector establishments including a project with Rua Al Madinah (PIF Company) and I have participated in various mentorship and leadership roles.

Why Elm?

Elm is a regional leader in digital transformation and technical solutions. And as a Software Engineer who worked with many software development establishments and worked on a wide spectrum of business domains, I believe my expertise and goals shall align perfectly with you.

Why Me?

I have production hands-on expertise in developing many software solutions for many business domains. I have experience collaborating with multi-national cross-functional teams, and I have been a part of scrum team activities and sprints that proved success with producing successfully scalable systems that solved business needs and generated +300,000 in revenue. And I have market experience with testing and developing CI pipelines to ensure the quality and integrity of the development output. I also have knowledge and experience with multiple software development patterns and architectures, including clean architecture, MVVM and the SOLID principles. And regarding Spring Boot in particular, I have built an asynchronous microservices applications that utilized both Kafka and RabbitMQ to stream, publish on demand and receive events from other services

Sincerely,

Abdullah Metwally
