Tamara Recruitment Team

December 17, 2025

TAMARA.

RIYADH, SAUDI ARABIA

Job Application for Software Engineer

Dear Tamara hiring team

About Me

Over my 6+ years of experience, I have worked in many fields, including the financial field. And I was able to successfully build and publish mobile applications and lead development teams through the development lifecycle.

Why Tamara?

Tamara's success in transforming the process of purchasing for both businesses and individuals has been inspiring. And I would like to be a positive and effective contributor in reaching more success and more people.

Why Me?

I have hands-on expertise in many of the domains you mentioned were important. I have experience collaborating with multi-national cross-functional teams, and I have been a part of scrum team activities and sprints. And I have market experience with testing and developing CI pipelines to ensure the quality and integrity of the development output. I also have knowledge and experience with multiple software development patterns and architectures, including clean architecture, MVVM and the SOLID principles. Regarding Flutter in specific, I have practical and proven experience with the BLoC and Riverpod state management solutions, in addition to multiple local storage and database solutions, like Shared Preferences, Hive, sqflite and drift. I also have real experience writing native features like dynamic island live activities.

Sincerely,

Abdullah Metwally
